Seeing the Wood for the Trees: An Analysis of Evolutionary Diagrams in Biology

Seeing the Wood for the Trees: An Analysis of Evolutionary Diagrams in Biology TextbooksCatiey, Keryn M.; Novick, Laura R. *Bioscience*. 58.10 (Nov 2008):976-987. Citation/Abstract Full text + Graphics Scanned PDF (16 MB)**Abstract (Summary)**

This study presents the findings of an analysis of evolutionary diagrams found in textbooks for students ranging from middle school to the undergraduate level. Since the early 1990s, cladograms have found their way into high school biology textbooks, yet we know little about their effectiveness as interpretive and instructional tools in biology education. In this article we document the frequency and types of cladograms found in 31 textbooks, and classify and survey the other types of evolutionary diagrams used in the texts. Although cladograms comprised approximately 72 percent of the diagrams overall, we found virtually no attempt to explain their structure and theoretical underpinnings. Various other noncladogenic evolutionary diagrams, comprising 28 percent of the total, were distributed throughout all textbooks studied. On the basis of our analysis, we conclude that many of these evolutionary diagrams are confusing and may reinforce alternative conceptions of macroevolution. Biology educators should therefore recognize these problems and take measures to ameliorate their effects. [PUBLICATION ABSTRACT]

The screenshot shows the ProQuest My Research interface. At the top, there is a navigation bar with "My Research (1 new) | Welcome, quack | Sign out" and "Search | Advanced | Publications | Databases". Below this, the ProQuest logo is visible. The main heading is "My Research: New documents (1) < Back to results". A green box highlights a row of action buttons: "Email", "Print view", "Cite this", "Export citation", "Save as file", "Add to folder", "Share", and "Delete". Below the buttons, there is a list of documents. The first document is "Seeing the Wood for the Trees: An Analysis of Evolutionary Diagrams in Biology Textbooks" by Catley, Kefyn M; Novick, Laura R. BioScience, 58.10(November 2008):976-987. It includes a "Citation/Abstract" link, an "S.F.X" icon, and a "Preview" button. A sidebar on the right shows "Sort Results By" set to "Date added" and a "Sort" button. Below that, it shows "Research" and "New documents (1)" with sub-counts for "Documents (0)", "New figures & tables (0)", and "Figures & tables (0)".
